# S. KANN, SONS & CO.

# Our New Home.

We have thrown open our doors to the public and welcome all Washington to one of the finest business centres in the entire South. It's a monument for this city as well as the founder of this great and growing establishment. We came among you as strangers less than eight years ago and confined our business enterprises until we saw that we were welcome. This was of a short duration, for it seemed that everyone extended a glad hand the moment our doors were opened. From that moment we saw a great future, and we knew we had to grow, for enterprise knows no limit. Year after year we grew. Year after year we added to our plant, expanding in all directions, allowing nothing in the way of monetary deals or bard work to thwart our efforts. The results are before you. Of course, without your confidence and combined aid, our showing would have been for naught. Therefore, in this hour of triumph we offer to every past and present patron our most sincere thanks and at the same time assure them that the same liberal policy which in all these years has proven honorable and just will not be changed, only for betterment. Our Opening bargains are all souvenirs, made special for this occasion.

## YEAR'S BUILDING RECORD.

Reports of the Inspector and Assistants Show Activity.

ings-One Hundred and Awenty-eight Apartment Houses Erected-Confusion in House Numbering.

John B. Brady, Inspector of Buildings, esterolay submitted to the District Com-nissioners his report for the fiscal year ended June 30, 1961. The report shows that permits were issued for the erection or repairs of 5.199 buildings, involving an expenditure of \$6,194,080. The report also shows that permits were issued for 1.657 year, being an increase of 165. The number of permits for repairs in 1961 was 1,896, and in 1960 was 1,520, there being an increase from the former year of 356. Of the new buildings erected during the period covered by the report 734 were dwellings, as against 650 the previous year. The permits for apartment houses during the fiscal year were 128, as against 50 the previous year.

The value of new buildings erected dur-ing the fiscal year was \$5,106,001, and of repairs, \$884.467. The receipts of the of-fice of the Building Inspector for the is-sue of permits were \$1,755, an increase of \$356 over the previous year.

The inspector states that, in addition to the permits included in the above summary, miscellaneous permits were issued for which no fees were exacted, such as renewals of entrance steps, temporary structures for the use of builders in constructing buildings, and extra occupancy of public space for the storage of ma-

"The volume of work this office has had t odeal with," says Mr. Brady, "has had t odeal with, says Mr. Brady, has been attended to as promptly as it has been possible to do so, and as the num-ber of hours in an official day is not sufficient to meet the demands of the public for inspections, the corps of assistant inspectors have willingly worked beyond the official time allotted so as to comply with the request of the con-tractors and builders for inspection of trenches and foundations de order to reduce to a minimum delays in construction.

"Adverse criticism has been indulged in to a large extent by the builders and oth-ers interested in building, due to the loss of time in having troposed projections beyond the building line approved within a reasonable time after application has been made therefor to this office. By act been made therefor to this office. By act of Congress passed March 3, 1891, the extension of any building or buildings, or any part or parts thereof in the city of Washington, in the District of Columbia, beyond the building line, and upon the streets and avenues, shall not be granted, except upon special application and with the concurrence of all of the Comwith the concurrence of all of the Com-missioners and the approval of the Secretary of War.

"As the applications for projections, as now made, necessarily pass through many bands, the average time consumed before-approval is secured is ten days. In order to prevent unnecessary delay in the construction of buildings pending approval of applications for projections, and solely as a privilege, the Commissioners have permitted excavations within building lines to proceed in advance of action on the question of projections. This privilege has unfortunately been abused in many instances, and unauthorized excavations have been begun without the building lines. Complaint of the necessary delay in the granting of building

cessary delay in the granting of building permits involving projections beyond the building line should be reserved until builders no longer abuse the privilege granted them with the object of facilitating their operations.

The confusion row prevailing in house numbers in many parts of the District, especially in the suburbs, due to the subdivision of land into narrower lots than twenty feet in width, the limit first established for basing numbers and the erection of houses thereon, is a subject which must be corrected as quickly as possible. In partly improved squares it is manifest that the introduction of narrow houses affect existing numbers on buildings previously erected, and to eliminate the condition now prevailing, it is recommended that a commission, composed of two persons, be appointed, to whom a salary of \$1.000 each, per annum, be paid, so that the correction of the house numbers may be accomplished at the earliest practicable moment."

The inspector reports that since July 1 contracts have been entered into for the construction of three school buildings.

The number of buildings proundered was \$29.

'The increase in the actual number of visits,' says the report, 'is greater than in any previous year, in spite of the fact that members of your staff were again, as inst year, broken down from cycrwork, much valuable time thus being lost.

'The decrease in condemnations is not, as the above facts will prove, due from lack of attention to our official duties, but from the fact that more prosperous times have enabled the citizens to care fer their propertie: by removal and repair, and also from the fact that one large building will now be erected in place of many small ones as in previous years, thus decreasing the number of party wall condemnations, etc.

'During the fiscal year just ended we

rensing the number of party wall conlemnations, etc.

"During the fiscal year just ended we
have endeavored, with the limited force in
the office, to perform the dutier entrusted
to us. Our experience has been varied,
from attending to the most trivial complaints to the supervision of the large
mereantile, office and apartment buildings
in course of crection and repair. We find
that it is impossible to cover the vast
territery allotted to each man and give
the proper time and attention to the inspection of buildings for wiffelt we are
held responsible.

"This having been the year of a Presidential inauguration, for two weeks prior
to the 4th of March your entire staff of
assistant inspectors were (in connection
with their other duties) actively engaged
day and night inspecting the construction
of the many reviewing stands and superintending the work of re-enforcing the
beloonies along and adjacent to the line
of parade; not less than 2,000 premises
were thus visited, and it is a matter of
note that not one accident courierd
through faulty or defective construction."

## AN ANNIVERSARY SPECIAL

Finest French Flannel Waists, \$2.48 (Worth \$5, \$6, and \$7.)

THEY are samples. This is why we can offer you French Flannel Waists such as these for such a ridiculous price. Every season when the manufacturers have finished taking orders they sell their samples to some favored customer. This season they come to the "Dependable Store."

They are actually and honestly worth \$5, \$6 and \$7, and you'll say so, too, when you see them. BUT, REMEMBER, they are mostly in 34 and 36 sizes. These are the sizes in which sam ples are made.

You'll find among them the following colors: Black, navy, old rose, red, light blue, pink, cardinal, reseda, garnet, etc. And they are most beautifully made. Quite a few are "button-in-theback" style.

Some are trimmed in hand-worked Persian embroidery and plain hand-worked embroidery. Others are trimmed in tailormade bands; some have bolero jacket effects; others have tuck ing and cording while many are trimmed in applique. New braiding effects are shown, too, and there are a few Raglan effects. These waists are worth \$5, \$6 and \$7; to square morrow they go at "SAMPLE PRICE"...... \$2.48

Foster Hurst, colored, charged with stealing a set of barness from Z. B. Honey, was held in \$500 bends to await the action of the grand jury. This is said to be Hurst's second offence.

## Half and Half.

The dyspeptic may well be represented pictorially as being half masculine and half feminine, and combining the least desirable characteristics of either sex. He has all the stubbornness of the man

ritability of a sick woman. He's not pleasant company at home or abroad. Dr. Pierce's Golden Medical Discovery cures dyspepsia and other diseases of the stomach and associated organs of diges-tion and nutrition. It renews physical health which carries with it cheerfulness of temper, and makes

life a pleasure instead of a penance. The "Discovery" purifies the blood by eliminating the coraccumulations from which disease is bred. It increases the activity of the block-nucling glands, so increasing the supply of pure rich blood, which gives life to every organ of the body. It gives new

life and new strength. "Your 'Golder, Medlical Discovery' has per-formed a wonderful cure," writes Mr. M. H. House, of Charleston, Franklin Co., Ark. "I had the worst case of dispersia, the d.ctors say, that they ever saw. After trying seven doctors and exerything I could hear of, with no benefit, I tried Dr. Perce's Golden Medical Discovery and now I am cured." Accept no substitute for "Golden Med-

ical Discovery." There is nothing "just as good" for diseases of the stomach,
